ASHISH BIRADAR

Data Analyst | Python & SQL | Financial & Macro Data | Dashboards & Automation

ashishvb001@gmail.com • +91 9969184518 • Portfolio • GitHub • LinkedIn • Mumbai, Maharashtra, IN

Summary

Data Analyst with 2.5+ years in a buy-side investment firm (Category III AIF), working with financial, macroeconomic and industry data. Builds Python-based ETL pipelines on ACE Equity, automated financial models, weekly macro reporting and dashboards that turn raw data into research-ready insights. Proficient in Python, SQL and advanced Excel, with a strong focus on data accuracy across research outputs.

Experience

Augmenta Asset Manager LLP — Mumbai, Maharashtra, IN

Data Analyst — 03/2024 – Present

- **Financial Model Automation:** Automated the full financial model lifecycle, from data extraction via ACE Equity through ratio analysis, cash flow, balance sheet and P&L projections, cutting model turnaround from 3 days to 1 day (67% reduction) for the research team.
- **Python ETL Pipelines:** Built Python pipelines to extract Nifty index and constituent price data from ACE Equity, then transform and load structured datasets into research models, replacing fully manual processes.
- **Macroeconomic Data & Reporting:** Compile and analyse India and global macro datasets for the weekly Macro Update, covering a recap of the past week, the economic calendar for the week ahead and a view on Indian markets, to support investment themes and research discussions.
- **SQL & Data Management:** Used SQL to query, join and validate structured financial datasets before they feed research models and reports.
- **Dashboards & Visualisation:** Designed and maintain Excel dashboards that consolidate multi-source financial data to show trends and patterns, improving reporting clarity and speeding up decisions for the investment team.
- **Industry & Trade Analytics:** Extract and analyse import/export data for listed companies and commodities on Volza to identify industry trends and support sectoral analysis and stock ideas.
- **Research Collaboration:** Streamlined the data-to-research handoff by standardising data formats and delivery processes, which removed bottlenecks and raised analyst productivity.
- **Data Accuracy & Fund Operations:** Perform NAV and fee calculations for Augmenta's Category III AIF (AUM: ₹150 Cr), ensuring accurate fund accounting in line with SEBI requirements, and support Compliance with ad hoc data and reporting tasks.
- **Reporting & Presentations:** Produce monthly management reports and presentations on key financial metrics, performance indicators and risk factors for senior stakeholders.
- **AI-Assisted Development:** Use Claude AI as a coding assistant to prototype automation scripts and Excel macros quickly, and to build reusable Python libraries for financial data transformation.

Learners Academy — Mumbai, Maharashtra, IN

Computer Teacher — 10/2023 – 12/2023

- Taught computer skills from basic to advanced, including Python programming, and graded projects and examinations.

Key Projects

Financial Model Lifecycle Automation | Augmenta Asset Manager

Built an end-to-end pipeline that combines ACE Equity extraction, Python transformation logic and structured Excel output, generating ratio analysis, P&L, cash flow and balance sheet projections in a single run and reducing analyst effort by 67%.

Weekly Macro Update Automation | Augmenta Asset Manager

Streamlined the weekly preparation of the firm's Global Macro Update, consolidating India and global macro indicators and the economic calendar into a standard research-ready format.

Flight Visualisation & Analytics System | Self-Initiated

Built an aviation data analysis pipeline in Python (Pandas, NumPy, Matplotlib, Seaborn) to uncover operational patterns through multi-format visualisations.

Technical Skills

Languages & Libraries: Python (Pandas, NumPy, OpenPyXL, Matplotlib, Seaborn, Scikit-learn), SQL
Databases: SQL Server, MySQL, PostgreSQL (querying, joins, data validation, structured data modelling)
Financial Data Platforms: ACE Equity, Volza (import/export analytics)
Excel & BI: Advanced Excel (financial models, pivot tables, dynamic dashboards, VBA macros), Power BI, Tableau
Domain: Company financials, ratio analysis, macroeconomic indicators, NAV & fee calculation (Cat III AIF)
Tools: Jupyter, Google Colab, VS Code, Git, Claude AI (AI-assisted scripting)

Education

Bachelor of Engineering – Computer Engineering, Shivajirao S. Jondhale College of Engineering, Dombivli 2023
CGPA: 8.03 (70.72%)

Certifications

Data Science & Machine Learning – The Skillians (Pursuing) • Data Analytics with Tableau – Jobaaj Learnings • Python for Everybody – Coursera • Machine Learning Masterclass & AI Masterclass – Pantech Solutions
