ASHISH BIRADAR

Data Analyst | Python & SQL | Machine Learning | Data Visualization

ashishvb001@gmail.com • +91 9969184518 • Portfolio• GitHub • LinkedIn • Mumbai, Maharashtra, IN

Summary

Detail-focused Data Analyst with hands-on experience in data warehousing, financial data analysis, and business intelligence. Proficient in Python, SQL, Tableau, and Power BI. Proven ability to automate data pipelines, build insightful dashboards, and translate complex datasets into actionable business decisions. Passionate about Big Data and committed to continuous learning.

Experience

Augmenta Asset Manager LLP — Mumbai, Maharashtra, IN
Data Analyst — 03/2024 – Present

- **End-to-End ETL Automation:** Automated the full financial model lifecycle — from data extraction via ACE Equity through Ratio Analysis, Cash Flow, Balance Sheet, and P&L Projections — cutting turnaround time from 3 days to 1 day (67% reduction).
- **Python ETL Pipelines**: Built Python-based extraction pipelines to pull Nifty index and constituent stock price data from ACE Equity; transformed and loaded structured datasets into Excel models, replacing entirely manual processes.
- **AI-Assisted Development**: Leveraged Claude AI as a coding assistant to vibe-code and rapidly prototype automation scripts and Excel macros, accelerating development of reusable Python libraries for financial data transformation workflows.
- **CAT III AIF Fund Operations**: Performed NAV and fee calculations for Augmenta's Category III AIF (AUM: ₹150 Cr), ensuring accurate fund accounting and alignment with SEBI regulatory requirements.
- **Dashboard Engineering**: Designed and maintained structured Excel dashboards consolidating multi-source financial data, significantly improving reporting clarity and enabling faster, data-driven decisions for the investment team.
- **Cross-Team Workflow Optimization**: Streamlined the handoff workflow between the data team and research team, standardizing data formats and delivery processes to eliminate bottlenecks and improve analyst productivity.
- **Market Intelligence**: Utilized Volza to extract and analyze import/export data for listed companies and commodities, identifying market trends and supporting strategic investment decision-making.
- **Compliance Support**: Supported the Compliance department with ad hoc data and reporting tasks, demonstrating cross-functional versatility in a regulated financial environment.
- **Reporting & Presentations**: Produced monthly management reports and presentations summarizing key financial metrics, performance indicators, and potential risk factors for senior stakeholders.

Learners Academy — Mumbai, Maharashtra, IN
Computer Teacher — 10/2023 – 12/2023

- Planned and delivered engaging lessons covering basic to advanced computer skills including coding languages such as Python.
- Instructed students in a manner that built confidence in technical abilities and encouraged independent problem- solving.
- Observed and managed classroom dynamics to ensure a productive and inclusive learning environment.
- Invigilated and graded projects, quizzes, and examinations to assess student progress.

KEY PROJECTS

Financial Model Lifecycle Automation | Augmenta Asset Manager

- Built an end-to-end automated pipeline integrating ACE Equity data extraction, Python-based transformation logic, and structured Excel output — generating ratio analysis, P&L, cash flow, and balance sheet projections with a single execution, reducing analyst effort by 67%.

Flight Visualisation & Analytics System | Self-Initiated

- Developed a comprehensive aviation data analysis pipeline using Python (Pandas, NumPy, Matplotlib, Seaborn) to uncover operational patterns via multi-format visualizations including bar, histogram, and pie charts.

Fitness Watch Data Analysis | Self-Initiated

- Analyzed Apple fitness watch datasets to extract behavioral insights; produced line charts, treemaps, and scatter plots using Pandas and Matplotlib for multi-dimensional pattern recognition.

Blockchain Crypto Wallet Application | Major Academic Project (2022–23)

- Designed and developed a full-stack blockchain-based cryptocurrency wallet with SHA-256 transaction encryption, built on Node.js (backend) and React.js (frontend).

TECHNICAL SKILLS

Core Languages: Python (Pandas, NumPy, OpenPyXL, Matplotlib, Seaborn, Scikit-learn), SQL

ETL & Automation: ACE Equity data extraction, Python ETL pipelines, Excel Macros (VBA), AI-assisted scripting (Claude)

Databases: SQL Server, MySQL, PostgreSQL — schema design, query optimization, structured data modeling

Dashboards & BI: Power BI, Tableau, Advanced Excel (pivot tables, dynamic dashboards, financial models)

ML Frameworks: TensorFlow, Keras, PyTorch, Scikit-learn

Financial Tools: ACE Equity, Volza (import/export analytics), NAV & fee calculation (CAT III AIF)

Dev Tools: Jupyter Notebook, Google Colab, Visual Studio Code, Git (version control)

Soft Skills: Analytical Thinking, Cross-functional Collaboration, Problem-Solving, Communication, Leadership.

EDUCATION

Shivajirao S. Jondhale College of Engineering, Dombivali — Dombivali, Maharashtra, IN

Bachelor of Engineering – Computer Engineerin — Graduated: July 2023

CGPA: 8.03 (70.72%)

CERTIFICATIONS

Data Science and Machine learning — The Skillians (Pursuing)

Artificial Intelligence Masterclass — Pantech Solutions

Machine Learning Masterclass — Pantech Solutions

Data Analytics with Tableau — Jobaaj Learnings

Python For Everybody — Coursera
